Doors open; optimism and opportunity expand.

Saturn

Harder, but where discipline and mastery build.

Uranus

Read your map in 5 steps

The formula is simple: planet (the theme) + angle (the area of life).

1

Get your exact birth time

Date and city set the planets; the exact minute sets the angles. A 4-minute error shifts a line ~100 km.

2

Render all 40 lines

Each of the 10 planets draws up to 4 lines (AC, DC, MC, IC). On a 3D globe there is no Mercator distortion.

3

Read planet + angle as a phrase

Venus + DC = warmth in partnership. Sun + MC = visibility. Saturn + AC = pressure, but mastery.

4

Find lines near real places

A line matters most for cities within ~80–160 km. Look for lines that pass near places you could live.

5

Match the line to your question

Love? Venus & DC. Career? MC & Jupiter. Rest? Moon & IC. Fresh start? A clean, supportive angle.
